

LESOTHO

- Animal health: Tabitha M. Seeiso
- Medical : Makhoase L. Ranyali-Otubanjo

Introduction

- Makhoase Lydia Ranyali-Otubanjo interests----
- District Health Manager

INTRODUCTION

- TABITHA MASENTLE SEEISO.
- DIRECTOR VETERINARY PUBLIC HEALTH & FOOD SAFETY.

Expectations

- To get updates on the management of Rabies. In Lesotho we only face it during outbreaks most of the time.
- To learn from other countries how they manage and decentralise rabies commodities such as vaccines etc.
- To learn from colleagues challenges faces in their countries and solutions (in terms of finances, maintenance of cold chain....)

Significance

- I manage cases of rabies at health facility level up to the community level such as raising awareness in the community about rabies.
- There is rapid response team at the districts which makes sure that there is rapid response when outbreaks occur.
- Making sure that there is rabies vaccine at the district (Public Health department).
- Liaise with relevant department such as Agriculture for control and prevention of rabies.
